

## INSTRUCTION

### Homework

It is the belief of the Board of Education that homework and summer assignments are essential components of quality education. Learning activities scheduled outside the classroom are a vital aspect of the school experience as reflected in the mission statement of Regional District #13's Strategic Plan: "...all students will be engaged and ethical lifelong learners...". The Board recognizes that homework can include memorization, drill, as well as critical and creative thinking.

Developing and implementing a successful and developmentally appropriate homework policy should be the responsibility of the personnel of the individual buildings.

Policy Adopted: December 1, 1993

Policy Revised: March 8, 2000

Policy Revised: January 9, 2013
